Bite block for immobilisation

Water Bath

Analogic and digital thermostatic water baths

Thermostatic water baths with analogic or digital temperature.

Main Features:

- ▶ Capacity 40L.
- ▶ Temperature: from 5° to 99,9°C.
- ▶ Programmable temperature holding time (0-99.5 h – Digital series).
- ▶ Safety thermostat.
- ▶ Electrical resistance in stainless steel inside the tank.
- ▶ Drain tap incorporated.
- ▶ Perforated resistance tray and optional perforated transparent lid.

eXaCast Oven EX-631

Convection oven system

Industrial oven designed with compact dimensions for effortless installation. Its advanced technology ensures a uniform heat distribution throughout the interior while keeping the surfaces and external glass cool to the touch.

Main Features:

- ▶ Plug and play installation and minimal maintenance.
- ▶ Single phase electrical supply.
- ▶ Internal Dimensions: 680x470x285mm.
- ▶ Two double glazed doors.
- ▶ Interior light.

Simulation Couch

Lift stretcher

This stretcher is specifically designed for the simulation.

Main Features:

- ▶ Its height is adjustable electronically.
- ▶ It can be displaced on its four wheels.
- ▶ Brake pedal to lock its position.
- ▶ It has different indexing points compatible with standard indexing bars.
- ▶ Dimensions: 190 cm long and 53,5 cm wide.

Silverman Headrest

PVC Headrest

This product is compatible with the majority of immobilisation systems for the head and head and shoulders currently on the market.

Main Features:

Manufactured in high-performance, transparent radiotransparent PVC.

Can be cleaned with water, alcohol or nonabrasive antiseptic cleaning fluids.

Different heights and contours provide the necessary versatility to achieve the desired angulation of the head.

Each model is codified with a letter (A~F) for easy identification during daily use.

Blue Series Headrest

Rigid Foam Headrest

This product is the improved version of the classic TIMO headrest. With surfaces that are smooth to the touch and a more rounded form, it produces topical images without sacrificing functionality.

Main Features:

- ▶ Made of rigid polyurethane foam polyurethane covered in integral skin foam, fusing comfort, strength, durability and radiotransparency.
- ▶ The different heights and contours allow for the versatility necessary to achieve the desired angulation of the patient's head.
- ▶ Can be cleaned with, alcohol or non-abrasive cleaning fluids.
- ▶ Each model is codified with a letter (A ~ F) for easy identification during daily use.

Prone Headrest

Rigid Foam Prone Positioning Headrest

This product is designed for prone positioning of the patient, offering comfortable support for the chin and forehead. Adaptable to any standard immobilisation system for the head and head & shoulders with the use of specific adaptors.

Main Features:

- ▶ Made of rigid polyurethane foam polyurethane covered in integral skin foam.
- ▶ Combines comfort, strength, durability and radiotransparency.
- ▶ Can be cleaned with water, alcohol or non-abrasive cleaning fluids.
- ▶ Available in two models to better adapt to each patient.

PronPillo Pillow

Prone Positioning Anatomical Pillow

This product is designed for the prone positioning of patients, offering comfort and support for the arms and face. PronPillo can be combined with other prone positioning devices such as the eXaProne.

Main Features:

- ▶ Made of rigid polyurethane foam polyurethane covered in integral skin foam.
- ▶ Combines comfort, strength, durability and radiotransparency.
- ▶ Can be cleaned with water, alcohol or non-abrasive cleaning fluids.
- ▶ Compatible with open prone positioning systems or without arm and head support.

Multi-Purpose Support Cushions

Multi-Purpose Support

Rigid foam cushions with easy-to-clean cover (light grey).

Available in various shapes to suit the patient's needs:

- ▶ Wedge: 40 x 15 x 25 cm.
- ▶ Cylinder: 15 (Ø) x 40 (w) cm.
- ▶ Half Cylinder: 15 x 15 x 40 cm.
- ▶ Pillow: 20 x 35 x 15 cm.
- ▶ Other formats available upon request.

Indexing Barrs

Fixation Devices

AnatGe offers a wide range of indexing bars manufactured in carbon fibre and adapted to each treatment table or CT, according to the manufacturer specifications:

- ▶ ELEKTA
- ▶ VARIAN

Bolx Bolus

Silicone Bolus

Highly adaptable bolus to the contour of the body surface without any significant change in thickness.

It is made of non-allergenic and biocompatible material, which can be cleaned with water or alcohol-based detergents.

It comes in two thicknesses (0.5 and 1cm) and can be easily cut to the desired size with scissors.

ElastoGel

Auto-adhesive Sheet

The Elastogel is easy to use, its adhesive properties allow for its use for any contours.

The Elastogel is available in two thicknesses (0.6|1.25 cm) and in different sizes.

Trident Oral Bite

Bite Block for Immobilisation

The Trident Oral Bite is available in three different sizes adapted to dental pieces (incisors) to facilitate jaw positioning. The system also displaces the tongue and creates a canal, allowing the patient to breathe freely.

Available Formats:

▶ Ref: BBCTOB1: W:40 x L:80 x H:15.

▶ Ref: BBCTOB2: W:40 x L:80 x H:25.

▶ Ref: BBCTOB3: W:40 x L:80 x H:30.
